T.C. KİMLİK NUMARASI :													
ADI :													
SOYADI :													
ÖĞRENCİ NO. :										SIRA NO. :			

Soru kitapçık numarasının cevap kağıdına kodlanmamasının veya yanlış kodlanmasının sorumluluğu adaya aittir.

**SORU KİTAPÇIK NUMARASI:**

Bu numarayı cevap  
kağıdındaki ilgili alana  
kodlamayı unutmayınız.

9. - 15. sorularda, cümlede boş bırakılan yerlere uygun düşen sözcük ya da ifadeyi bulunuz.

9. The brown bear is a large bear that inhabit ---- northern Eurasia and North America.

- A) many
- B) none
- C) much of
- D) several
- E) a good deal

10. ---- is called Morse code today is actually somewhat different from ---- was originally developed by Vail and Morse.

- A) Where / how
- B) Which / what
- C) That / which
- D) What / what
- E) How / that

11. Liz woke up very early this morning ---- she would be at the airport before her guests arrived.

- A) likewise
- B) though
- C) in case
- D) in order that
- E) but

12. At the beginning of this century, there was some disagreement over ---- the game of football actually originated.

- A) how long
- B) what
- C) how
- D) whether
- E) that

13. Gunpowder was the only explosive until the mid-19<sup>th</sup> century and was used ---- as a propellant in firearms ---- as a bursting charge in grenades and shells.

- A) either / but
- B) both / and
- C) neither / no
- D) not only / and
- E) no sooner / than

14. The compound, ---- the active ingredient in aspirin was first derived, salicylic acid, was found in the bark of a willow tree in 1763.

- A) whom
- B) from which
- C) when
- D) of whose
- E) with which

15. The warmth of the class ---- almost all the students ---- during the lesson, which made the teacher angry.

- A) made / doze
- B) let / to doze
- C) have / dozed
- D) get / dozed
- E) have / to doze

59. - 63. sorularda, boş bırakılan yere, parçada anlam bütünlüğünü sağlamak için getirilebilecek cümleyi bulunuz.

59. ---- The first one is normal matter, which are the physical objects in the universe such as the planets. The second is dark matter, which is invisible matter that creates the gravitational pull that causes galaxies to form. The last one is an unknown energy referred to as 'dark energy', the force which causes the universe to expand.

- A) The Universe is very large and possibly infinite in volume.
- B) Scientists claim that the universe is made up of three different components.
- C) Black holes form, when stars much larger than our Sun, run out of their fuel.
- D) How the universe was created is one of the questions that will probably never be answered completely.
- E) The universe has not been the same at all times in its history.

60. Sprinters typically reach top speed after somewhere between 50-60 m. ---- Maintaining that top speed for as long as possible is a primary focus of training for the 100 m. In the past, athletes often competed over 100 yards instead of 100 m, especially in the United States. This distance is now obsolete.

- A) For the 100 m race, all competitors are lined up side-by-side before they start to race.
- B) Sprints are short running races in athletics.
- C) Their speed then slows progressively towards the finish line.
- D) Any athlete who ran outside the assigned lane was disqualified.
- E) Finishing times are, thus, only recorded by an electronic timing system.

61. Scientists say Earth's atmosphere acts like a greenhouse. Carbon dioxide and other gases in the atmosphere trap heat from the sun preventing the heat from escaping into outer space. ---- However, the balance is changing. Human activities are producing increased amounts of carbon dioxide and other gases. Burning fuels like oil and coal is a major cause and clearing forests for agriculture is another.

- A) Recent data also shows this concentration is increasing at a higher rate.
- B) Water vapour accounts for the largest percentage of the greenhouse effect.
- C) The burning of fossil fuels since the industrial revolution has increased the levels of greenhouse gases in the atmosphere negatively.
- D) This balanced system makes it possible for plants, animals and people to survive on Earth.
- E) The United States emitted 16.3% more greenhouse gas in 2005 than it did in 1999.

62. There are several theories about the cause of Parkinson's. ---- Studies have shown a link between the disease and some chemical products. Two years ago, for instance, a study found a link between Parkinson's and pesticides. Another study found that serious head injuries also increased the risk.

- A) The most commonly used drug is levodopa combined with carbidopa.
- B) But none has ever been confirmed.
- C) However, most cases involve people with no such family history.
- D) The company is working with two not-for-profit groups.
- E) Another area of study is family genetics.

74. Toplantıda söylemek istediğim şey üretimin başka yollarla artırılması gerektiği idi fakat sözlerim yanlış anlaşıldı.

- A) What I was trying to say at the meeting was that the production had to be increased through different ways but my words were misunderstood.
- B) The thing that I meant to say at the meeting was that different ways must be followed to increase the production; however, my words were misunderstood.
- C) The fact that the production must be increased by different ways was one of my ideas which was misunderstood.
- D) What I said at the meeting was that the production was increased by using different ways; however, my words were misunderstood.
- E) Although my words were misunderstood, what I tried to say at the meeting was that different ways had to be used to increase the production.

75. Şu anda migrenin sebebi bilinmiyor ancak atakların beyindeki kan damarlarının ve bazı sinir hücrelerinin yanı sıra vücuttaki kimyasal değişikliklerle bağlantılı olduğu söyleniyor.

- A) Even though the reason of migraine is unknown, the attacks are said to be linked to chemical changes in the body. Besides, blood vessels and certain nerve cells in the brain affect these chemical changes.
- B) It is said that migraine attacks have a connection with the chemical changes in the body in addition to the blood vessels and certain nerve cells in the brain.
- C) The reason of migraine is unknown now; nevertheless, attacks may be linked to not only chemical changes in the body but also blood vessels and certain nerve cells in the brain.
- D) People don't know the reason of migraine now; however, it is said that attacks are linked to both chemical changes in the body and certain nerve cells in the brain.
- E) The reason of migraine is unknown now; however, it is said that attacks are linked to chemical changes in the body as well as blood vessels and certain nerve cells in the brain.
