### Exercise 1 (Nouns)

exceptions dent addition  
defects saliva construction  
access idea obstacles  
poison disorders membrane

1. Microsoft passed an important milestone having installed more than 11,000 centrally managed \_\_\_\_\_ points in its wireless LAN.
2. Though there are \_\_\_\_\_, models are usually slender and they move on the catwalk gracefully.
3. Roughly speaking, I can say that we need two million dollars to complete our \_\_\_\_\_ project.
4. In today's age of fast information, with nutrition advice available at the click of a button, the \_\_\_\_\_ of calorie counting seems so old fashioned that it's just a relic from the past, with no relevance today.
5. A grasshopper can leap over \_\_\_\_\_ 500 times its own height. In relation to its size, it has the greatest jumping ability of all animals.
6. The pitohui bird of Papua New Guinea has enough \_\_\_\_\_ in its feathers and skin to kill mice and frogs.
7. Young people with heart \_\_\_\_\_ should avoid intensive competitive sports.
8. Your mouth produces about ten thousand gallons of \_\_\_\_\_ in a lifetime.
9. Large wound \_\_\_\_\_ are best treated by surgical closure, and should not be allowed to heal by spontaneous or natural means.
10. Monkeys have the ability to perform mental \_\_\_\_\_ and in fact, they perform about as well as primary school students given the same test.

### Exercise 2 (Nouns)

fridge fertility interactions  
immunity donor span  
elevations territory fluctuation  
feelings avenue tip

1. The Ketchua Indians of the Andes Mountains in South America have two to three more quarts of blood in their bodies than people who live at lower \_\_\_\_\_.
2. Cooling down after exercise by walking slowly, then stretching muscles, may prevent blood pressure \_\_\_\_\_.
3. \_\_\_\_\_ among the senses, nerves, and brain make possible the learning that enables human beings to cope with changes in their environment.
4. Girls born to men who are older than fifty have an average life \_\_\_\_\_ that is six years shorter than their brothers.
5. Researchers claim that the colour light-green is effective in relieving the \_\_\_\_\_ of homesickness.
6. One individual organ transplant \_\_\_\_\_ can provide organs, bone, and tissue for 50 or more people in need.
7. Stress may be good for people. An acute episode of stress boosts \_\_\_\_\_, offering better protection against infection.
8. By far the most common reason for a dog to become aggressive toward a cyclist is that the animal wants to defend its \_\_\_\_\_ from a large, fast-moving intruder.
9. Starfish have eyespots at the \_\_\_\_\_ of each arm. These act as light sensors, and contain a red pigment which changes chemically in the presence of light.
10. The country of Yemen has the world's highest \_\_\_\_\_ rate among women at an average of 7.6 children.

# NOUNS TEST -1

1. - 20. sorularda, verilen tmcede bo bırakılan yerlere uygun den szk ya da ifadeyi bulunuz.

1. In the past ten years, organ ---- have saved more lives and improved the quality of living for more Americans than the United States lost in the Korean and Vietnam wars combined.
